Response to Amendment

This is in response to the Amendment filed 5 May 2006.

(Previous) DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The rejection of claims 3 and 4 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention has been **withdrawn** in view of Applicants' Remarks.

Claim Rejections - 35 USC § 102

2. The rejections of claims 1 and 7 under 35 U.S.C. 102(b) as being anticipated by EP 0 263 052 have been **withdrawn** in view of Applicants' Amendment.

Claim Rejections - 35 USC § 103

3. The rejections of claims 5 and 6 under 35 U.S.C. 103(a) as being unpatentable over EP 0 263 052 as applied to claim 1 above, and further in view of Jones et al. (6,739,302) have been **withdrawn** in view of Applicants' Amendment.
4. The rejections of claims 3, 4 and 8 under 35 U.S.C. 103(a) as being unpatentable over EP 0 263 052 as applied to claim 1 above, and further in view of Mukerjee et al. (6,692,859) have been **withdrawn** in view of Applicants' Amendment.

(NEW) DETAILED ACTION***Drawings***

5. Figure 1 is objected to as failing to comply with 37 CFR 1.84(p)(5) because it includes the following reference character(s) not mentioned in the description: reference sign “14”.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claim 9 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 2006/0099464.

Although the conflicting claims are not identical, they are not patentably distinct from each other because:

The apparatus of claim 9 differs from claim 1 in that claim 9 fails to disclose thermal insulation which thermally insulates the manifold assembly from ambient temperatures so as to limit moisture condensation in the fuel gas passage. However, the scope of claim 9 is broader than that of claim 1 (i.e. the scope of claim 9 fully encompasses the scope of claim 1). Further, the preamble to claim 1 recites “comprising” which is open-ended language which does not preclude other structural limitations such as thermal insulation.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
